OUR CORE VALUE

DESIGN ARCHITECT

Architecture is the architecture of the Neolithic period. In Southwest Asia, Neolithic cultures appear soon after 10,000 BC, initially in the Levant (Pre-Pottery Neolithic A and Pre-Pottery Neolithic B) and from there spread eastwards and westwards. There are early Neolithic cultures in Southeast Anatolia, Syria and Iraq by 8000 BC, and food-producing societies first appear in southeast Europe by 7000 BC, and Central Europe by c. 5500 BC (of which the earliest cultural complexes include the Linearbandkeramic, and Vinča). With the exception of the Andes, the Isthmus-Columbian area and Western Mesoamerica (and a few copper hatchets and spear heads in the Great Lakes region), the people of the Americas and the Pacific remained at the Neolithic level of technology up until the time of Western contact.

The Neolithic people in the Levant, Anatolia, Syria, northern Mesopotamia and Central Asia were great builders, utilizing mud-brick to construct houses and villages. At houses were plastered and painted with elaborate scenes of humans and animals. The Mediterranean Neolithic cultures of Malta worshiped in megalithic temples.

In Europe, long houses built from wattle and daub were constructed. Elaborate tombs for the dead were also built. These tombs are particularly numerous in Ireland, where there are many thousands still in existence. Neolithic people in the British Isles built long barrows and chamber tombs for their dead and causewayed camps, hedges flint mines and curses monuments.

OUR CORE VALUE

VASTU

We providing best Vastu when you are in entry for positive ambience

There exist many Vastu-Sastras on the art of building houses, temples, towns and cities. One such Vastu Sastra is by Thakkura Pheru, describing where and how

temples should be built.[By 6th century AD, Sanskrit manuals for constructing palatial temples were in circulation in India.Vastu-Sastra manuals included chapters on home construction, town planning, and how efficient villages, towns and kingdoms integrated temples, water bodies and gardens within them to achieve harmony with nature.While it is unclear, states Barnett, as to whether these temple and town

planning texts were theoretical studies and if or when they were properly implemented in practice, the manuals suggest that town planning and Hindu temples were conceived as ideals of art and integral part of Hindu social and spiritual life.

NOW IIT KHARAGPUR STARTED FOR COURSE ON VASTU SASHTRA , BECAUSE VASTU VIGYAN BASED ON SCINCE, ITS PROVEN BY INDIAN GROUP OF SCIENTISTS

GALLERY
